

Reusable document module

one implementation and versioned contract; explicit data and service needs

reuse

Editor

GUI and document
module instance

reuse

Batch converter

CLI and document
module instance

reuse

Validation service

API and document
module instance

Own context
and state
clipboard and files

Own context
and state
input and
output streams

Own context
and state
request data
and storage

Shared kernel contracts in each composition.
Reuse does not require sharing one live instance.
